

LUNA THOMAS

Senior Machine Learning Engineer | AI | Financial Services

+1-(234)-555-1234 Email linkedin.com github.com/lunathomas San Diego, California

SUMMARY

Over 8 years of experience as a machine learning engineer with a focus on artificial intelligence applications for financial services. Proficient in Python, TensorFlow, and deploying machine learning solutions in cloud environments. Team player and mentor celebrated for leading cross-functional teams to execute scalable AI-driven products enhancing operational efficiency.

SKILLS

Python TensorFlow Machine Learning Data Analysis Cloud Deployment Algorithm Design

EXPERIENCE

- 01/2025 - Present

San Francisco, CA

Senior Machine Learning Engineer

AI Dynamics

 - Led the development and deployment of machine learning models that reduced data processing time by 30%.
 - Collaborated with cross-functional teams to design AI solutions improving client operational efficiency by 20%.
 - Implemented state-of-the-art algorithms improving prediction accuracy of financial data models by 15%.
 - Mentored a team of 4 junior engineers, enhancing their productivity by 25% through guidance and training.
 - Presented technical insights and results to stakeholders, increasing project approvals by 18%.
- 06/2019 - 12/2024

Los Angeles, CA

Machine Learning Engineer

DataInsights Corp

 - Optimized machine learning models for 10% improved scalability and performance.
 - Deployed machine learning solutions in cloud environments, reducing infrastructure costs by 12%.
 - Collaborated with data scientists to develop tailored algorithms, increasing extraction accuracy by 17%.
 - Conducted regular A/B testing, significantly fine-tuning model performance by 10%.
- 07/2016 - 05/2019

San Diego, CA

Data Scientist

Tech Innovators

 - Developed predictive models that increased client revenue by 22% through enhanced market analysis.
 - Utilized Python and R to automate data pipelines, reducing data processing time by 20%.
 - Collaborated effectively with engineers and PMs, delivering projects 15% ahead of schedule.
 - Contributed to code improvements, reducing error rate by 25% in data models.

EDUCATION

- 01/2012 - 01/2016

San Diego, CA

Bachelor of Science in Computer Science

University of California, San Diego

PROJECTS

- Financial Data Predictive Model

Created an open-source financial market predictive model system. More information at [github.com/lunathomas/finmodel](#)
- AI-Based Risk Assessment Tool

Developed a tool for AI-based risk assessment in financial sectors. See details at [github.com/lunathomas/airfrisk](#)

KEY ACHIEVEMENTS

- Operational Efficiency

Increased operational efficiency by over 20% through the implementation of innovative AI solutions in 2024.
- Model Accuracy

Enhanced model accuracy in prediction by 15% using custom algorithms, contributing to key strategic initiatives.
- Mentorship Success

Successfully mentored 4 junior engineers, leading to a promotional rate 25% higher than company average in 2023.
- Stakeholder Engagement

Boosted project approval rates by 18% by delivering impactful presentations to stakeholders and clients.
