OBJECTIVE

Third-year B.Tech student specializing in Generative AI and AI/ML, seeking internships and hackathon opportunities. Strong foundation in machine learning, deep learning, and generative AI concepts with hands-on project experience. Passionate about building intelligent systems that solve real-world problems.

EDUCATION

B.Tech in Computer Science & Engineering (IoT)

2024 – 2028

G.H. Patel College of Engineering and Technology, Gujarat • CGPA: 8.65 / 10

Relevant Coursework: Machine Learning, Deep Learning, NLP, LLMs, Prompt Engineering, RAG, Vector Database, Embedding, Fine-Tuning Models, DBMS, Data Structure & Algorithms, IoT, Operating System

TECHNICAL SKILLS

Languages	Python, SQL, C, C++
ML / DL	Scikit-learn, TensorFlow, XGBoost, LightGBM, Neural Networks
NLP / CV	HuggingFace Transformers, spaCy, OpenCV, YOLO
Data	Pandas, NumPy, Matplotlib, Seaborn, Vectorization, Tokenization
Tools & Skills	N8n, Langchain
Cloud	Google Colab
Databases	PostgreSQL, MongoDB, MySQL, RAG

PROJECTS

Flowmid AI | Personal Project

- Built an AI-powered workflow automation platform using FastAPI, PostgreSQL, and Google APIs to automate repetitive Gmail-based tasks.
- Implemented intelligent PDF classification, smart Google Drive organization, deadline extraction, and automated Calendar reminders using NLP/ML techniques.
- Built AI-powered automation workflows for organizing email attachments into structured category-wise Google Drive folders and automatically scheduling submission deadlines and meeting reminders on Google calendar.

Github: <https://github.com/krish1315/Flowmind-AI>

Medivault | Hackathon Finals Project

- Developed a healthcare document management platform for securely storing medical reports, prescriptions, and health records.
- Integrated Gemini API to generate AI-based medical report summaries and trend analysis for user health records of any particular type or general all reports, across configurable timelines such as 3 months, 6 months, and 1 year.
- Developed a privacy-preserving healthcare analytics demo system to identify disease patterns and demographic-based medical trends from aggregated backend data without exposing sensitive information.

Github: <https://github.com/krish1315/Medivault-Platform>

Trashly AI — Agentic Waste Management System | AI Agent Builder series 2026 (Google) Finalist project

- Built an end-to-end agentic waste management system using Google ADK, Gemini 2.0 Flash, Firebase, and Vertex AI that autonomously classifies waste from sensor-triggered camera images, monitors bin fill levels in real time, generates disposal reports, and notifies sanitation crews without any human dispatcher in the loop.
- Integrated Google Maps API for live bin tracking and route visualization, Firebase Firestore for real-time sensor data sync, and Firebase Cloud Messaging for instant crew push notifications with optimized route details.
- Engineered a smart route optimization engine that auto-triggers when bin capacity is 95%, scans all bins within 5km, consolidates almost filled(+75%) or full bins pickup into a single optimized trip, and calculates exact distance saved and rupees saved per route.

Github: <https://github.com/krish1315/Trashly-AI>

INTERNSHIPS & EXPERIENCE

AI/ML Intern | Sparks To Ideas

Remote • April – Jun 2026

- Worked on machine learning and NLP pipelines involving email classification, text preprocessing, feature extraction, and workflow automation use cases
- Developed an intelligent email classification system using DistilBERT, TF-IDF vectorization, and NLP-based categorization for automated workflow organization for my personal project – Flowmind AI
- Implemented an LLM-based validation layer to recheck misclassified emails, enabling accurate category-wise classification

Github: <https://github.com/krish1315/Flowmind-AI-models-Pipeline>

ACHIEVEMENTS & HACKATHONS

- 🏆 Top 5 Finalist — IEEE TechSangam National Hackathon 2025 (MIT Pune)
- 🏆 Top 5 Finalist — AI Agent Builder series 2026 (Powered by Google)
- 🏆 Finalist — TechTonic 2025 (CHARUSAT), IEEE HackX 2025 (Nirma University), CVMU 4.0 2026
- 📜 Certified: Oracle Generative AI Certification (2025)
- 📜 Certified: Apna College Job Ready AI/ML Course
- 📜 Certified: Google Gen AI Academy 2.0 (Domain – AI/ML[Student-Track])

LEADERSHIP & EXTRACURRICULARS

- Led a multidisciplinary team to secure a Top 5 finalist position nationally at IEEE TechSangam 2025
- Serving as GeekForGeeks Campus Ambassador 2026
- CSI (Computer society of India) Member 2024-25

★ Open to internships, hackathons & research roles ★
